DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 297 13 522.

The German reference discloses the claimed method including generating mechanical resistance within a rear portion of the convertible top between main arm 5 and main link 10 when the top is being closed as a result of compression of force storage means 19. This mechanical resistance results in the last portion of the closing movement being damped as stated on lines 7-8 of the English Summary provided for the German reference.

Allowable Subject Matter

3. Claims 1-19 are allowed.

Art Unit: 3612

4. Claims 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited reference includes a damping arrangement for a convertible top.
